OVERVIEW

A passionate and detail-oriented aspiring Frontend Developer with an intermediate foundation in React.js, HTML, and CSS. Eager to apply academic knowledge and self-learned skills to build responsive, user-friendly web applications. Committed to learning modern frontend technologies, writing clean and maintainable code, and contributing effectively to collaborative projects while continuously improving technical expertise.

SKILLS

Languages: C, C++, JavaScript.

Frontend Technologies: ReactJS, Redux Toolkit, HTML, CSS, Bootstrap, TailwindCss, Custom Hooks, Context APIs

Backend Technologies: Firebase, OOP, Data Structure, Algorithm

Development Tools & IDEs: Visual Studio Code

Project Management Tools: JIRA, GitHub

Communication Channel: Slack, Zoom, Google Meet, Microsoft Teams.

EXPERIENCE

INTERN – REACT JS

AverLynx 2025(may)-2025(July)

Lahore

- Built and maintained responsive web pages using React.js, HTML, and CSS.
- Worked with design teams to develop user-friendly web interfaces.
- Learned and applied state management concepts using Redux Toolkit and Context API.
- Implemented responsive styling using Material UI.
- Integrated simple third-party APIs to display dynamic content.
- Collaborated with backend developers to connect the frontend to APIs.
- Focused on code quality, reusability, and following best practices.
- Explored push notifications with Firebase (basic understanding).
- Gained experience in deploying and maintaining web projects.
- Practiced version control with Git and collaborated on projects using pull requests

EDUCATION

Virtual University of Pakistan
Bachelor's in Software Engineering -BSSE

2022-Present
CGPA:3.1/4.0

PROJECTS

Elderly Care Home Management System (*Final Year Project*)

Tech Stack: HTML5, CSS3, PHP, MySQL

- Developed a web-based management system to streamline operations in elderly care homes, enabling staff to manage resident profiles, medical records, and schedules efficiently. Designed intuitive HTML/CSS interfaces for easy navigation, ensuring accessibility for non-technical staff.
- Implemented PHP-based backend functionalities for secure CRUD operations (Create, Read, Update, Delete) on resident and staff data.
- Integrated MySQL database for storing and retrieving resident health information, attendance logs, and staff assignments.
- Focused on responsive design for compatibility across desktop and tablet devices used in care facilities.

Portfolio Website

Tech Stack: React.js, HTML5, CSS3

- Developed a responsive personal portfolio website to showcase projects and skills, implementing modern UI design principles for an engaging user experience.
- Integrated smooth navigation, responsive layouts, and reusable components in React.js to ensure compatibility across devices.

Weather Forecast Web App

Tech Stack: React.js, HTML5, CSS3

- Built a weather application that fetches real-time weather data from the OpenWeatherMap API. Implemented API integration, state management, and conditional rendering to display temperature, location, and weather conditions dynamically.
- Designed a clean, mobile-friendly interface for a smooth user experience across devices.

ACHIEVEMENTS

- Assisted in building parts of the frontend for an AI-powered health prediction platform using React.js, contributing to a responsive and user-friendly interface.
- Helped create interactive charts using Recharts to display patient health metrics, making data easier to understand for healthcare teams.
- Worked closely with a backend developer to connect the frontend with APIs, test features, and ensure smooth platform functionality during the launch phase.
